AI INDUSTRY – Assessment report

Illustrative example only. No live assessment was performed; all twelve controls are NOT_TESTED.

Coverage: PASS: 0, FAIL: 0, NOT_TESTED: 12, NOT_APPLICABLE: 0, INCONCLUSIVE: 0

Results apply only to the declared scope and available evidence. This is not certification of the whole system.

1. Assessor and scope

Report id: example-aiindustry-pdf-json-not-tested
Report revision: 1
Report spec version: 2.0.0
Record kind: example
Created at: 2026-11-20T00:00:00Z
Language: en
Visibility: public
Assessor / Name or pseudonym: Illustrative example only
Assessor / Relationship: unknown
Assessor / Independence statement: No assessment performed.
Assessor / Human review: not_applicable
Assessor / Client: none
Assessor / Model: none
Plan / Mode: public-observation
Plan / Collection window / Start: 2026-11-19T00:00:00Z
Plan / Collection window / End: 2026-11-19T00:00:00Z
Plan / Days: 7
Plan / Sample rule: Latest five articles would be selected; this example collected none.
Plan / Selected articles: none
Plan / Exclusions [1]: All live collection and active testing excluded in this illustrative example.
Completion / Status: complete
Completion / Missing capabilities: none
Completion / Notes: Complete structural example only, not a completed assessment of the system.

2. Observed state and evidence

Subject / Url: https://aiindustry.sk/
Subject / Snapshot ids [1]: illustrative-snapshot-not-observed
Collection / Tool calls: 0
Collection / Errors: none
Collection / Before evidence id: not provided
Collection / After evidence id: not provided
Collection / Identity change note: Illustrative example; no publication identity was observed.

Project condition 1

Requirement index: 1
Conclusion: Not evaluated in this illustrative example.
Evidence ids: none

Project condition 2

Requirement index: 2
Conclusion: Not evaluated in this illustrative example.
Evidence ids: none

Project condition 3

Requirement index: 3
Conclusion: Not evaluated in this illustrative example.
Evidence ids: none

Project condition 4

Requirement index: 4
Conclusion: Not evaluated in this illustrative example.
Evidence ids: none
Other observations: none

5. Coverage and findings

Coverage / Pass: 0

Coverage / Fail: 0

Coverage / Not tested: 12

Coverage / Not applicable: 0

Coverage / Inconclusive: 0

Findings: none

6. Limitations and reassessment

Limitations [1]: This is a complete structural example, not an audit of AI INDUSTRY. All 12 controls remain NOT_TESTED.

Supersedes: not provided

Report payload SHA-256: 41d4fdabac7c39e7f77c28c706f145c135a6b4c63ca0a0f6dfbaa37fb067659c

SHA-256 of RFC 8785/JCS canonical UTF-8 bytes of the report object only; not the entire report.json file.

PDF SHA-256 is stored in report.json integrity.pdf_sha256 after final PDF creation.

Hashes do not establish truth, authorship, independence or trusted time. A party able to replace both files can recompute both hashes.

Evidence bytes are embedded in report.json; this PDF lists identities, provenance, hashes and sanitization notes.
